Office Phone: +86-10-62792738
Target Students: Undergraduate

Course Description:

This course provides a comprehensive introduction to the concepts and principles about data communication and computer networking, including architectures, protocols, technologies, hardware, software, and applications. Emphasis is put upon the requirement analysis and design of networking applications in organizations, while topics such as management of communications networks, cost-benefit analysis, and evaluation of connectivity options are covered, so as to help students learn to evaluate, select, and implement different communication options within an organization.

Pre- knowledge Requirement:

Programming Language, Computer Systems Architecture.

Textbooks & References:

- 1.Textbook: *Computer Networks: A Systems Approach*, (5 ed.) , by Peterson, L.L., and Davie, B.S. , China Machine Press, Beijing, 2012. (original version: Elsevier, Inc., 2012).

Target Students: Undergraduate

Course Description:

Public Finance studies the role of the public sector in the economy. In this course, we will study the economic foundations that justify the existence of the public sector, and the economic theory that describes what the role of the public sector should be. We concern when the governments should intervene the economy and how they should do so, including what options they have and what are the effects of the policies. The focus is on the government taxes and spending activities. We will also look at the governments' policies in the reality, and study how the policies affect individual and corporate decision-making and welfare.

Pre- knowledge Requirement:

Intermediate Macroeconomics

Textbooks & References:

The main text is: *Public Finance and Public Policy*, 3th edition, by Jonathan Gruber, Worth Publishers, 2009. I also recommend the textbook, *Public Financ*, by Harvey S Rosen, Ted Gayer, McGraw-Hill, 9th edition, 2010.

Office Phone: +86-10-62772126; +86-10-62789819

Target Students: Undergraduate

Course Description:

The course presents basic theories of microeconomics and its applications. Topics covered include consumer theory, firm theory, market supply and demand, externality and public goods, industrial organization, and general equilibrium. The economic modeling methods and analytical tools are emphasized throughout the course.

The purpose of this course is to make students well trained and proficient in analyzing with systematic microeconomics theory.

As a core course in economics, this course has been contiguously endeavoring to keep pace with the leading level. The written materials are English mainly while the oral expression is both in English and Chinese. The lectures delivered by Professor will be in English, the corresponding tutorial classes delivered by TAs will be in Chinese and English.

Pre- knowledge Requirement:

intermediate microeconomics

Textbooks & References:

1. *Intermediate Microeconomics A Modern Approach*. 8th Edition, by Hal R. Varian: W.W. Norton & Company. New York, NY. 2010.
2. *Workouts in Intermediate Microeconomics*. 8th Edition, by Theodore C. Bergstrom and Hal R. Varian, W.W. Norton & Company. New York, NY. 2010.

Credits: 3
Semester: Fall 2018
Instructor: ZHENG Jie
Office: Room 561, Weilun Building
E-mail: zhengjie@sem.tsinghua.edu.cn
Office Phone: +86-10-62789819
Target Students: Undergraduate

Course Description:

For each topic listed below, we will discuss how behavioral models use psychological foundations to expand upon “standard” economic theory, in order to more accurately capture observed empirical phenomenon in daily life and in the laboratory. The prerequisites for the course are Intermediate Microeconomics and Multivariable Calculus, which are important for understanding the materials we cover. Knowledge of statistics and econometrics is also helpful. All assignments and exam papers for the course should be written by yourself in English

Pre- knowledge Requirement:

Intermediate Microeconomics, Multivariable Calculus

Course Name (EN): Topics on International Accounting
Credits: 3
Semester: Fall 2018
Instructor: HAO Zhenping
Office: Room 352, Weilun Building
E-mail: haozhpl@sem.tsinghua.edu.cn
Office Phone: +86-10-62788143
Target Students: Undergraduate

Course Description:

To understand the development of accounting and financial reporting models in the world, and to enable you to evaluate the reasons and evolution of international accounting harmonization and convergence;

To provide you with the key technical issues in international accounting area and their impact on financial reporting, such as accounting for foreign currency transactions, translation of foreign financial statements and accounting for changing prices; and

To understand some management accounting issues in multinational operations, for instance, the establishment of management control and information system, financial risk management, international taxation, and international transfer pricing.

Many of the topics in an international accounting course have a domestic counterpart. However, new factors and complications arise in the international arena. Some of these are (1) laws, practices, customs, cultures, and diversity of competitive circumstances; (2) risks associated with fluctuating exchange rates, differential rates of inflation, and unstable property rights; and (3) variations in taxes and tax rates. International accounting discusses issues from the perspective of companies that have internationalized their finance and/or operations. It also has a comparative aspect, comparing accounting across countries. It also deals with convergence of worldwide financial reporting standards. This course is designed to provide you with an understanding of the significant issues in international accounting.

Pre- knowledge Requirement:

Fundamentals of Accounting

Textbooks & References:

1. Textbook: *International Accounting*, 6th Edition, by Frederick D. S. Choi, and Gary K. Meek, China Renmin University Press, 2008.
2. References: *International Accounting and Multinational Enterprises*, 6th Edition, by Lee H. Radebaugh and Sidney J. Gray, China Machine Press, 2007.

Course Syllabus

Course Number: 40510193-0
Course Name (CH): 管理系统模拟
Course Name (EN): Management Systems Simulation
Credits: 3
Semester: Fall 2018
Instructor: WEI Qiang
Office: Room 437, Weilun Building
E-mail: weiq@sem.tsinghua.edu.cn
Office Phone: +86-10-62789824
Target Students: Undergraduate

Course Description:

Many analytical models and mathematical tools have been used in business decision to improve the operational efficiency and seize the competitive advantage. Since, however, the real world business situation and environment, regarded as a system, is very complex, which results that the traditional analytical methods and tools cannot fit properly. This course will introduce a new methodology – simulation – into the business management systems. As its name says, in complex systems, where the number of related variables is huge and they are also closely interdependent, simulation method is to mimic the real parameters in computer system, using the time-advance mechanism, to generate the evolutionary results over time. In so doing, after enough replications of simulation, statistically confident results could be derived. Clearly, the computational load is extremely high. But, with mainstream personal computer nowadays, this process could be performed efficiently. In this course, we will cultivate the students with the abilities of modeling, simulation and analysis with computer and software.

This course includes: Basic Concepts on Simulation Modeling; The Simulation Process; Simulation with EXCEL; Input Analysis using Statistics; Random Number and Random Variable Generation; Basis of simulation with ARENA; Advanced simulation with ARENA; Output Analysis; Lecture on system dynamics.

By the end of the course, the students should: Master the methodology of simulation and can modeling complex business systems; Master the abilities of modeling with EXCEL and ProModel. Cultivate the ability for further simulation analysis, design and implement.

To accomplish this global goal, lecturing is far from enough; case programming, modeling and analysis, assignment and Q&A are also important.

Pre- knowledge Requirement:

Probability Theory, Statistics

Textbooks & References:

Simulation with ARENA, 4th edition, by W. David Kelton, Randall P. Sadowski, David T. Sturrock, McGraw-Hill Higher Education, New York, USA, 2007.

Course Description (course objectives and content):

The central goal of this course is to develop an integrative knowledge of the digital economy. It focuses on the information superhighway as the technological enabler that has dramatically changed the way in which companies orchestrate their value creation. This course, with a strategic perspective in mind, looks into the knowledge-enabled enterprises and the influence of electronic commerce in shaping the rules of modern business environments. From a managerial point of view, the course will delineate the skills and knowledge required in the digital world. Finally, this course also offers a technology perspective that touches upon the underlying IT mechanisms for electronic commerce.

Textbook:

Target Students: Undergraduate

Course Description:

ERP systems are enterprise-wide information systems that integrate various functional operations and streamline business processes. This course aims to introduce the concepts of ERP systems as well as the application, implementation, and management of ERP.

In particular, the course will help you to obtain the knowledge of ERP at three levels.

1. At the system level. Through hands-on experience with SAP in lab sessions, you will learn SAP commands and functions. You will be able to handle basic business processes in the SAP environment.
2. At the business process level. You will learn how functional operations interact and coordinate to complete business processes and how ERP can enable and facilitate business process integration.
3. At the organizational level. You will be able to recognize and understand organizational and managerial issues associated with enterprise systems, such as planning, vendor evaluation and selection, as well as system implementation.

The primary targets of this course are those who are interested to pursue careers in ERP systems firms as managers, software analysts and developers, in ERP consulting firms as consultants, and ERP industry user firms as system engineers. As this course can enhance the understanding of management information systems, it is also suitable for those who plan to pursue various IS professional careers.

Course Description (course objectives and content):

International Business differs in important ways from business conducted within national borders. It poses additional challenges but also offers new opportunities. This course focuses on the strategic challenges confronting firms that compete in the global economy. Material from strategic management, economics, organizational behavior, and other related areas are covered. Our objective is to have an enhanced understanding of the most fundamental question in international business: What determines the success and failure of companies in an international context? We emphasize the use of analytical tools and concepts but provide many real-world examples. Course projects help students develop their research and writing skills. The course is integrative by design, which leads to some overlap with material taught in other courses. The course topics may not follow the chapters of the textbook.

Textbooks & References:

Textbook:

Global Strategic Management, 2nd Edition, by Mike W. Peng, South-Western Cengage Learning (ISBN-13: 978-0-324-59098-2).

2. “Yunnan Baiyao: Traditional Medicine Meets Product/Market Diversification”, Richard Ivey School of Business 906M88-PDF-ENG
3. “Levendary Café: The China Challenge”, Harvard Business School 4357-PDF-ENG.

Grading (percentage of all the assessment methods involved):

No.	Assessment method	Percentage
1	Participation	15%
2	Individual assignment	15%
3	Group project a. presentation b. report	40% a.20% b.20%
4	Final exam	30%

Participation:

Regular attendance and class participation are critical to successfully completing this course. Given our limited class time, you are expected to participate actively in each class session. Please listen carefully to one another and attempt to build on or constructively critiques prior comments. An effective participant:

- Is a good listener
- Makes points relevant to the on-going discussion
- Makes comments that add to our understanding of the reading
- Is willing to challenge ideas that are being expressed
- Integrates material from past classes and other courses

Individual Assignment:

In the assignment, students will answer some questions about the cases to be discussed in class. The assignment should not exceed 3 pages double-spaced font 11 (excluding attachments). The due date is 5pm of day before the case session. Further details regarding the assignments will be made available at a later date.

Group Project:

The group project is practice for you to coordinate creativity in teamwork. You will form groups of 5-7 people. Teams are used in this course because teams play central roles in organizations. Working in teams provides you with an opportunity to learn from your colleagues, and practice (and evaluate your effectiveness) working, managing, solving problems, and making strategic decisions in a setting that approximates the management teams typically charged with such tasks. Teams should be formed no later than the third week. Mixed teams are encouraged. Members with diverse nationalities, genders, educational backgrounds tend to bring diverse knowledge and skills, which usually yields wiser decisions and more creative solutions.

There are two options for the project. Feel free to discuss with me about topic choices before

you start.

- Strategy analysis of an existing multinational corporation (MNC)
First, students will describe, analyze, and evaluate a firm's existing internationalization strategy; second, the students will propose some new internationalization strategies to the firm, arguing why the new strategies would improve the performance of the firm.
- Business plan of an international entrepreneurial startup (+15% bonus for challenging topic)
The startup will introduce a product or service to a foreign market. First, students will explain why the certain product or service is chosen, why the certain foreign market is chosen; second, the students will propose internationalization strategies to the startup, arguing why the strategies would help the startup survive.

There are two parts of the project.

- Written report
You are expected to submit a ten-page report (double-spaced, font 11). Every group must clear their topic with me by the eighth session. The latest time to submit the report without a late penalty is one day before the presentation session.
- Presentation
Each group will give a 12 minutes' presentation based on your written reports, followed by 8 minutes' Q&A. You are encouraged to use visuals in presentations. Please submit all your presentation materials (including PPT, videos, distributed readings, and references) by email to TA before the presentation.

A group's members get the same grade for their collective work. However, I understand that, for various reasons, there can be situations where members contribute unequally. On the last day of class, a peer evaluation form will be distributed. You would have the chance to evaluate your team members on their contributions to your group project.

Final Exam:

A final exam is scheduled during our final session. The exam consists of multiple choices and true/false questions. It will be cumulative and covering all materials (lecture slides and cases) throughout the course.

Final Notes: Late submission of assignments and projects will be penalized in grades. **Turn off ALL communication and entertainment devices.** Use of such devices in class disrupts the learning environment and is rude to others.

Course Syllabus

Course Number: 40511093-0
Course Name (CH): 财务管理
Course Name (EN): Financial Management
Credits: 3
Semester: Fall, 2018
Instructor: JIA Ning
Office: Room 201F, Weilun Building
E-mail: jian@sem.tsinghua.edu.cn
Office Phone: +86-10-62795524
Target Students: Undergraduate

Course Description:

Financial strategies encompass those financial decisions that affect the long-run value of the firm. The objective of this course is to build on the concepts of financial management learned in Corporate Finance (1) and other relevant courses to provide a bridge to understanding the underlying principles behind why these decisions are made and to offer explanations for observed behaviors on the part of financial decision makers. Focus will be placed on developing a comprehensive framework of conceptual knowledge that builds on the principle of value maximization. Capital budgeting, business valuation, investment analysis, capital structure, option theory, risk management, and long-term financing are integral parts of this conceptual framework.

Pre- knowledge Requirement:

Corporate Finance (1) or Instructor Consent.

Semester: spring autumn summer

Course Category: core course elective course

Target Students: Undergraduate Master PhD MBA EMBA TIEMBA

Instructor: LI Dan

Office: 201G, Weilun Building

E-mail: lidan@sem.tsinghua.edu.cn

Office Phone: +86-10-62796620

Course Description (course objectives and content):

The course is designed to provide the student with insight about auditing: what it is, why it's important, what it entails, and why users of financial statements should care about it. Its is an introduction to the audit function, audit standards, objectives and procedures, ethical and legal environment, materiality and audit risk, sampling, and reporting.

Course Objectives

This course emphasizes the manner in which the assurance function is performed, with an emphasis on the auditing of financial statement information. It continues with the content and learning methods introduced in your earlier accounting courses and with emphasis on understanding relevant professional standards and applying those standards. The specific learning outcome objectives are as follows:

Overall auditor responsibilities: Understand the nature of audit risk and an auditor's responsibility to detect financial statements misstatements and noncompliance with laws and regulations.

The audit process: Understand the nature of the audit process, including the nature of and relationships among financial statement assertions, audit objectives, audit procedures and audit evidence.

Reporting requirements: Apply appropriate audit reporting standards to various reporting situations.

Ethical responsibilities: Apply ethical standards to situations encountered by accountants.

Textbooks & References:

Principles of Auditing & Other Assurance Services, 18th edition by O. Ray Whittington, and Kurt Pany (published by McGraw-Hill Irwin).

Grading (percentage of all the assessment methods involved):

Your grade is a function of the following five items and their respective weights.

Participation	5%
Assignment	25%
Presentation	15%
Midterm Exam	20%
Final Exam	35%
Total	100%

Participation

Your participation score is based on your comments during the case discussion as well as class lecturing. Occasionally, I will randomly call on individuals in class. Otherwise you need to volunteer your comments. Everyone starts with zero in participation. To get participation points, you need to provide substantive comments on the cases.

Assignment

All students are required to finish homework independently. All assignments are due exactly at the beginning of the class of the due date. Late submission is not accepted.

Audit Presentation (Group Projects)

Each group is required to identify a public firm involved in financial statement related fraud, especially when external auditors are subject to regulatory investigation or enforcement. The students are expected to understand what and how financials are manipulated, how relevant accounting standards are misapplied. More importantly, standing in auditors' shoes, what audit procedures or detailed audit tests they should perform to be able to avoid audit failure. Your performance will be evaluated better if you can provide more thorough analysis and critical thought on issues discussed.

The student will have the option of selecting their own group or being assigned to a group. After the 2nd week, I need each group list all members in your group. The group projects will give you an opportunity to synthesize your audit knowledge, preparation skills, analysis abilities, communication competence, group efficiency, creativity and research skills. Each of these projects will be completed on a group basis and each group will make one presentation. The presentation should last no longer than 15 minutes. In addition to the instructor

evaluation of the group's performance, each group member will evaluate all other group members. This evaluation will be factored into the individual group member's grade.

Each group should inform me of the corporate name at least one week ahead of your presentation date. The presentation group is required to submit one complete case report at the end of presentation. The report length lasts no less than 6 pages with single space (except tables, graphs, etc.)

Office Phone: 010-62792726

Office Hour: TBD

Discussion Board: learning.sem.tsinghua.edu.cn

Course Description (course objectives and content):

This course is an introduction of Environmental and Natural Resource Economics. The objective of this course is for students to learn how basic economic theory can be used to understand and analyze environmental pollution and resource degradation problems. The course covers both conceptual and methodological topics and recent applications in China, US and European countries. Examples of local, regional, national and international environmental and natural resource issues are presented and discussed.

The first part of this course is an introduction to the basic principles of environmental and resource economics; cost and benefit analysis. In the second part the focus is on environmental economics and policy, including economics of pollution control, valuing the environment, regional and global air pollution, water pollution and so forth. The third part is focused on natural resource economics, both renewable and non-renewable resources. The last part is on sustainable development and macroeconomic aspect of environmental policy, and Green Accounting.

Principle of Economics is required for taking this course.

Textbooks & References:

Textbook

Tietenberg, Tom, Lynne Lewis, *Environmental & Natural Resource Economics*, 9th Edition, Prentice Hall

Berck, Peter and Gloria Helfand. *The Economics of the Environment*. 1st edition. 2011 Pearson Addison Wesley

Supplementary books

Hartwick, John and Nancy Olewiler. *The Economics of Natural Resource Use*. Second edition. Addison Wesley Longman, 1998.

Stavins, Robert N., ed. *Economics of the Environment: Selected Readings*, Fifth Edition. New York, New York: W.W. Norton & Company, 2005

Grading (percentage of all the assessment methods involved):

Problem sets	40%
Final	55%
In-class presentation (optional), attendance and classroom performance	5%
Total	100%

Problem sets:

Four problem sets will be assigned. The problem sets are designed to help you learn the material and they will also be a good study guide for the exams. They will be graded on a 100-point scale. Printed hard copy is strongly encouraged and will be collected in class (we don't accept email submission). Late problem sets will be marked down by 10% for each day late (submission after class will be treated as one day late, late problem sets need to submit to my office in person).

Presentation (Optional):

Students are encouraged to make in-class presentations. It is not required, but good presentations can be awarded as bonus points on the final grade, or helps when final grade is at marginal (say 89, 79).

Course Description

A well-functioning financial system is crucial to economic growth and development as it promotes efficient capital allocation, provides risk sharing, and reduces transaction costs. This course aims to help students understand the role of the financial system by focusing on its major components: financial markets and institutions. It will discuss the economic foundations of financial markets and management of financial institutions. It will also introduce the development of China's financial system and compare it with its U.S. counterpart.

others _____

Semester: spring **autumn** summer

Course Category: core course **elective course**

Target Students: **Undergraduate** Master PhD MBA EMBA TIEMBA

Instructor: LI Dan

Office: 201G Weilun Building

E-mail: lidan@sem.tsinghua.edu

Office Phone: 86-10-62796620

Course Description (course objectives and content):

The objectives of this course are to gain a more thorough understanding of financial accounting techniques and to explore the accounting theory underlying such techniques. Assets, revenue recognition, and income items, investments in other companies and stockholders' equity will be covered in this course. Students will also learn how to apply the skills of financial analysis to realistic situations, such as, valuations decisions or forecasting.

Course Method

Class meetings involve lectures, discussions and exercises. Class attendance is required in this class. The easiest way to let me know that you are making effort and engaging in this course is your participation. Students are encouraged to involve in class discussions. Since this course is rather technical in some sections, I believe consistent work and attendance are crucial to words understanding and passing the course. I hope every one (including me) will get more out of the class.

Target Audience

Knowledge of financial accounting is useful to *all* management students. My course is

designed to meet the needs of students who are interested in a more in-depth knowledge of financial accounting (beyond that obtained from introductory financial accounting) and students who are interested in careers in finance and accounting, including those seeking a professional designation in accounting (e.g., Certified Public Accountant or Certified Management Accountant).

Textbooks & References:

1. Required Textbook:

Financial Statement Analysis by K.R.Subramanyam and John.J.Wild. 10th edition, 2009, McGraw-Hill.

2. Lecture slides will be available for you on course discussion board.

Grading (percentage of all the assessment methods involved) **(subject to revision):**

Class Participation	7%
Individual Assignments	28%
Midterm Exam	35%
Final Project (group)	<u>30%</u>
Total	100%

1. Class Participation

I strongly encourage each student to read assigned materials before class and get well prepared for class discussion and analysis. Your active participation in class will be credited to your class performance.

3. Assignment

All students are strongly recommended to do the assigned text problems to thoroughly understand the material. For all homework, you should work independently and each one hands in an individual homework. Late submission WILL NOT be accepted!

4. Final Project

The final project will be done by group. You have options to select your group members after the first class. Assignment will be due exactly as required date. Each group will select one publicly traded firm that you are most interested in. Your grade on group final project will be based on your group oral presentation and the written report, which will be adjusted by each individual's contribution. For the details of project, please refer to the end part of the document.

Warning: Some of the material covered in this class is, at times, rather technical. In addition, the course can move at a brisk pace. DO NOT get behind! DO NOT try to cram for exams the day before!

Note: Instructor reserves the right to make changes to the syllabus when appropriate.

Course Syllabus

Course Number: 60610162-10

Course Name (CH): 初级汉语

Course Name (EN): Elementary Chinese

Credits: 2

Semester: Fall 2018

Instructor: LIU Haimei

E-mail: hm_170907@163.com

Target Students: Undergraduate

Course Description:

There are 2 sections of class each week, every section last for 50 minutes. In this course, you will improve your Chinese skills in the areas of speaking, listening, and will make significant gains in the acquisition of vocabulary and grammar. Time, discipline and commitment are required to succeed in this class. Memorization, repetition, recitation, and taking notes are skills that you need to utilize class.

Text Materials:

Handed out by the instructor. (you should take good care of the worksheet given by the teacher, if you lost it, no more will be given)

Grading:

Attendance :	20%
Assignments	20%
Quizzes	10%
Final (written)	50%

Clarification to Grading

Attendance everyone should attend the class on time unless you have a medical excuse written by your physician or an official document to prove that you have a good reason to skip the class.

Quizzes will be administered every week. No other notice will be given and the format and the content will be told a week before the quiz. The final quizzes score will be the average of seven quizzes. You have one chance to make up one of your quizzes, which you are

unsatisfied with the score or you miss because of any reason.

Assignments will be due in next class.

Extra Credit

Options for extra credit:

Practice writing characters.

Dictation about some extra characters. (ten characters one points)

* The Maximum of your total extra credit is 10 /100
