

Dear Colleagues:

We are excited to announce that the application for **2020 NTUST x Project LET'S Go! Summer Program** is launched. We are now accepting applications for volunteer teaching positions.

NTUST x Project LET'S Go! is an international service learning and non-profit organization that strives to innovate and refine the way that children in Taiwan learn English language, as well as develop critical thinking skills. We work with schools in rural areas of Taiwan that have few educational resources, and one of our main strategies is to motivate children to learn through extracurricular summer programs.

Our summer program was started in 2010 with just one small school, and has since grown to serve more than 7 communities and nearly 300 deserving schoolchildren. Every year, we look for passionate college students from all over the world interested in traveling, teaching, and helping kids realize their full potential to join our volunteer team. We value special qualities and unique experiences that every individual brings to the team. By joining our team, volunteers are signing

up for an incredible opportunity allowing them to exchange cultures, give back to local communities, and make lifelong friends and global connections.

We are always looking to expand our reach to new universities, and that is why we are so excited to reach out to you! Please refer to the attachment for a PDF poster, which provides essential information regarding the program and corresponding application. Any help in spreading the word about our program and the work we do is greatly appreciated!

You may read about our story on the latest edition of Taiwan Tech Newsletter, the official communication of NTUST with the world, [here](#). For more information, please feel free to visit our website at www.projectletsgo.org. The application form can be found by clicking this [link](#).

Please do not hesitate to contact me with any further questions or inquiries. Thank you for your time!

Warmest regards,

Wannie Wang, Ed.D.

Executive Director, Project LET'S Go!

Associate Professor, NTUST
