

Business development support for deep-tech semiconductor start-up

Background

We are an award-winning deep-tech semiconductor spin-off from the Chair of High-Frequency Electronics at RWTH Aachen. Our main product is a breakthrough „transceiver“ microchip for application in ultrafast 5G-A and 6G wireless infrastructure equipment and user devices. We are looking for part-time student support for our business development team.

Tasks

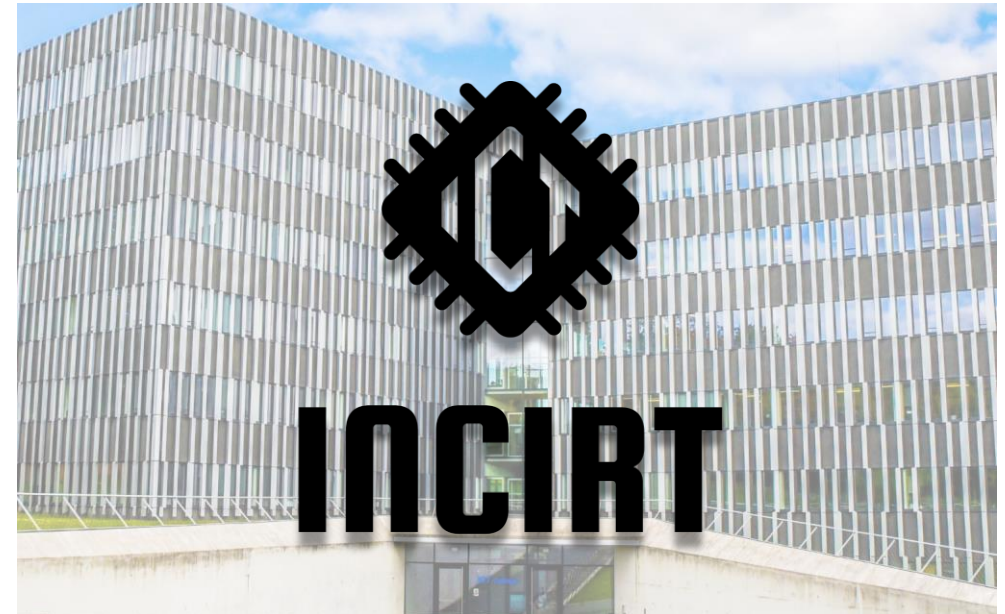

- You will be working within InCirT's business development directly with one of the founders
- You will engage in research tasks related to fund-raising activities, marketing, and market and industry research
- Your work will directly impact InCirT's corporate strategy

Requirements

- You are a bachelor's or master's student
- You are enrolled in a business related degree program
- You preferably have experience with Microsoft Office (Excel, Power Point)
- You have at least 8 hours of availability per week (we are of course flexible around exam periods)
- You speak English fluently, German is a plus

What we offer

- An opportunity to gather experience within an early-stage, highly ambitious, deep-tech start-up
- An agile, interdisciplinary and friendly team
- A customary student salary
